							MCKINSEY & COMPANY, INC. WASHINGTON			As this effort has matured, the expansion and refining of the existing scope is required to continue delivering to the initial requirements awarded on the initial contract. The three areas being modified and evaluated are: a) Strategic Sourcing Support, b) SLT Offsite Support, and O. Major Contract Actions Support The Strategic Sourcing Support is being refined to focus on the Mission Capability (MC) requirement related to the supply chain and sourcing of materials. This refined scope will focus on how sourcing of materials is impacting the fleet's ability to reach and maintain an 80% MC rate. The SLT Offsite Support expansion of scope is related to taking the next step from the Organizational Assessment and linking it to the existing workfore skillsets. Finally, the Major Contract Actions support is moving into a different phase and requires more support from McKinsey in closing out the efforts to award the

Column C									Government and Military Certification Systems			Branch is a depot level emergent repair team tasked with completing all maintenance and overhaul of the Aircraft Launch and Recovery Equipment (ALRE) systems onboard US Navy aircraft carriers and air capable ships. Achieving ISO 9001 certification means to pass a physical ISO 9001:2015 certification audit by a registra (a certifying agency). The proposed third party certification will enable VRT customers and command (NAVSEA, NAVAIR) to have assurance that the VRT Quality Management System (QMS) meets their requirements for compliance to ISO 9001:2015. In addition, the structured periodic surveillance audits over the 3-year contract will provide feedback to enable VRT management to comply with ISO requirements for continuous
